Codium Networks Launches New Business Consulting Services Practice Focused on New Mobile Wimax / 4G Telecom Operators

Proven industry international advisor will lead the unit to offer complete 4G business consulting services to established operators and new entrants

MADRID, SPAIN – January 19, 2009 – Codium Networks (www.codiumnetworks.com), the WiMAX IEEE802.16e leading independent specialist with a strong focus on mobile WiMAX, today announced the formation of a new business unit, focused on delivering a full range of business consulting services, enabling established operators and new entrants to effectively launch and run 4G mobile operations.

Targeting mainly Europe, Africa and Latin America, the business consulting practice will provide support in applying for licenses, the study and evaluation of 4G technologies and optimizing CAPEX investments, estimating user market size and terminal device requirements, as well as providing business plans and expected ROI analysis and running Project Management Offices to maximize the efficacy of operational implementations.

Headed by Luis Ronda, (Head of Practice) Codium Networks Business Consulting Services will provide a wide range of consulting services addressed to 2nd and 3rd tier established telecom operators and new entrants, willing to enter the disruptive and very lucrative 4G arena.

"The Business Consulting Services Practice will be an independent and highly dedicated business unit that is committed, focused, and organized to provide key advice to operators and investors to successfully develop their 4G opportunity and operations" said Ronda. "The market for 4G solutions is growing fast and no doubt will soon explode, and our business consulting expertise in 4G technology coupled with our strong portfolio of allied vendors and partners will provide our customers with the most valuable advice and innovative solutions to successfully develop their 4G operations but without any

prejudice whatsoever vis-a-vis their choice of technology or implementation partner."

Codium Networks acting as a Systems Integrator dedicated to Mobile WiMAX solutions has successfully designed, installed and in some cases operated, during the last 5 years, more than 15 WiMAX telecom networks in 10 countries across Europe, Africa and LATAM.

"We are very excited that Luis is leading this newly formed business unit," said Kiriako Vergos, CEO of Codium Networks. "His quite considerable experience and knowledge of the value consulting proposition will position Codium Networks to provide the highest quality solutions to our customers, and allow us to support the 4G deployments by the very best 2nd and 3rd tier operators."

Prior to joining Codium Networks, Luis Ronda, a 20-year veteran in the telecom industry, executed and managed international consultancy services in companies such as Analysys Consulting as well as acting as a prestigious independent international freelancer for several major telecom consulting initiatives in Europe and LATAM.
